PROJECTS

bookTrade - Book Exchange Platform | 🌐 Live 🐙 Github
Full Stack Development

Feb 2026 - Mar 2026

- **Developed** a **full-stack book exchange platform** using the **MERN** stack, featuring a **scalable backend** with modular architecture, including controllers, routes, and middleware.
- **Created RESTful APIs** for authentication, book listings, and request workflows, implementing secure **JWT** and **Google OAuth** for user login.
- **Engineered** a **request-based system** with states (pending, approved, paid, cancelled), enforcing rules for one active request per book.
- **Designed** a **responsive UI/UX** with dynamic profile sections for My Books, Requests, and Chats.

Technologies / Tools Used : React, Node.js, MongoDB, Express

Wanderlust – Travel Platform | 🌐 Live 🐙 Github
Full Stack Development

Oct 2025 - Nov 2025

Developed a **full-stack travel application** inspired by Airbnb, enabling users to **explore, filter, and manage destinations** such as hotels, beaches, and resorts.

- **Utilized** MongoDB, Express.js, Node.js, and JavaScript to ensure a **scalable backend** and **dynamic frontend** rendering.
- **Integrated** Cloudinary for **image storage**, enhancing media upload performance and optimizing retrieval speed.
- **Implemented** authentication and authorization features for **secure user management** and review posting.
